## Product highlights

### Built-in subwoofer

A built-in subwoofer provides all the low tones that are essential to a great listening experience - whether you are watching a movie or playing a music CD. The deepest bass notes come out rich and clear, ensuring sensational entertainment with the intensity and vim that was meant to be. Despite delivering a sound experience at full tilt, the built-in subwoofer carries with it none of the clutter - allowing you to savor complete entertainment while keeping your room completely fuss-free. Now enjoy both your room and the boom.

### Cinema Sound

Cinema Sound – powered by Ambisound – delivers dynamic sound from a single unit system, and an unbeatable listening experience in any sort of space. Using a carefully calculated mix of array processing, psychoacoustics and precise driver positioning, Cinema Sound delivers a sound field that is significantly widened, providing the listener with immersive sound – absolutely clutter-free.

### FullSound™

What is music without heart and soul? Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you experience truly immersive music – without any distortion.

### HDMI for simple AV connection

HDMI stands for High Definition Multimedia Interface. It is a direct digital connection that can carry digital HD video as well as digital multichannel audio. By eliminating the conversion to analog signals it delivers perfect picture and sound quality, completely free from noise. HDMI is fully backward-compatible with (Digital Video Interface) DVI.

### Integrated dock for iPod

An integrated dock lets you play movies, music and photos from your iPod. What's more, you can control the iPod and browse through its contents on your TV screen - all with the home theater system's remote. Doing away with cumbersome cables and connections, the integrated dock brings portable entertainment into your home - with absolute ease.
